

## Bell & Gossett lead-free\* potable water products.

Introducing a full line of potable drinking water products that aren't just clean – **they're also green.**

At ITT Bell & Gossett we're committed to providing water handling products that are efficient, safe, innovative and environmentally responsible. That's why we've expanded our line of lead-free potable drinking water products.

Now our pumps, circulators, flanges, tanks, valves and boosters intended for potable water applications are made of lead-free brass materials. They meet the requirements of California's AB1953 and Vermont's S152 legislation, and exceed current requirements in the other 48 states.

NBF, SSF  
and PL  
Circulators

MiniBooster  
Constant  
Speed Booster  
Package

Series 60

Diaphragm and  
Expansion Tanks

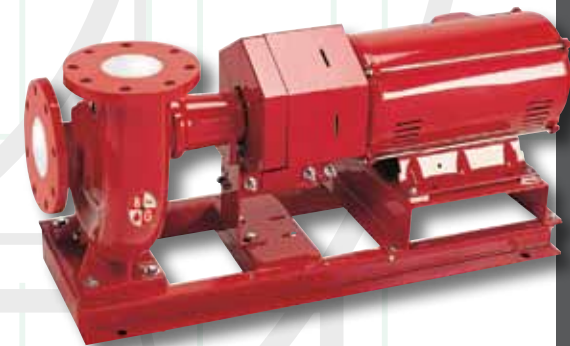

Series 90

ecocirc  
Circulator

Series 100  
and Series PL

Series 1510

\*Wetted surface contains not more than 0.25% of lead by weight.
